### **LINCOLN WINDOWS CHOOSES AAMA 2605 PAINT FOR CLAD PRODUCTS!**

**Merrill, WI. (February 12, 2014)** – Build with confidence by utilizing extruded aluminum clad Lincoln Windows and Patio Doors now supplied with the increased protection of AAMA 2605 paint, AAMA’s most stringent paint specification for painted aluminum finishes.

Aluminum has many strengths as a building material (design flexibility, product choice, strength, longevity, and availability) but to maximize these strengths, it should be covered with quality paint. Moving up to the highest standard is fitting with Lincoln’s long-term goal of being your preferred window supplier.

AAMA 2605 paint is perfect for light commercial applications when color-matching extends to aluminum storefront material, steel roofing, siding and other ornate parts where metal is commonly used and accepted.

Lincoln only uses strong .050 extruded aluminum exteriors for both frame and sash components. Extruded aluminum is formed and then painted so adhesion is better versus painting roll-form type aluminum and then forming it around window parts.

The natural enemies of painted surfaces include: heat, UV, airborne chemicals, salt water and temperature fluctuations. These lead to chalk and fade issues that equal premature aging. AAMA 2605 paint performance is simply far superior.

That’s exactly why Lincoln now offers a 10-year paint warranty.

Lincoln Wood Products, Inc. has been manufacturing high quality wood windows and patio doors for new construction, remodeling and light commercial projects for over 60 years. Based in Merrill, Wisconsin, the privately owned company engineers windows and patio doors for visual appeal as well as outstanding performance and backs it up with exceptional customer service before and after the sale. Lincoln windows and patio doors are marketed through a network of over 400 independent distributors throughout the U.S. For more information visit [www.lincolnwindows.com](http://www.lincolnwindows.com) or call 800.967.2461.
